Cisco TelePresence MX700 & MX800

Cisco TelePresence MX700 and MX800 represent the performance line within Cisco's portfolio of integrated video collaboration room systems. They combine beautiful design and powerful functionality into an all-in-one solution for medium-to-large meeting rooms. These multipurpose systems will transform your meeting room into a video collaboration hub - whether for connecting teams across the globe or for local meetings. The MX700 features dual 55-inch LED monitors for a people+people or people+content experience, while the MX800's 70-inch single LED monitor offers a peopled-focused solution.

The MX700 and MX800 systems come standard with a built-in amplifier and speaker system for the ultimate high fidelity sound. You can choose from a powerful single camera or an intelligent dual-camera speaker-tracking solution; both cameras deliver the best possible video imaging with up to1080p60 resolution. Premium resolution and dual display are also standard features on the MX700 and MX800. The intuitive Cisco TelePresence Touch 10 provides an ever so easy-to-use interface for both MX700 and MX800 systems.

Industry standards compliance lets the MX700 and MX800 support calls with any third party, standards-based system. Support for H.264 SVC also means the MX700 and MX800 can interoperate with software-based video conferencing solutions. And, as the industry's only H.265-ready systems, the MX700 and MX800 lay the foundation for future bandwidth efficiencies made possible by the new standard.

Product Features

Table 1 summarizes the key features for the MX700 and MX800 systems.

Table 1.	Feature Summary
----------	-----------------

Feature Summary	
Design features	 One of the most powerful and feature-rich video systems available with the ultimate in video and audio quality The next generation HD video collaboration codec The next generation HD PTZ camera Everything you need in one unit (Screens, speakers, codec, camera, User Interface, Microphones, mounting) Wallmount or Floorstand (2 Floorstand options included: Freestand and wall secured floorstand) Industry first built-in speaker tracking system as option
Application features	 1080p30 HD embedded Cisco TelePresence MultiSite with individual transcoding Collaborate with four simultaneous video inputs HD collaboration with 1080p60 main and 1080p30 content One button to push (OBTP) to start a meeting Ideal for team-based collaboration, boardrooms, meeting rooms and video centric rooms Dual presentation outside of a call (increase usage of system outside of a call - use the MX700 dual screens to compare 2 presentations/documents)
Performance features	 Optimal definition up to 1080p60 H.323/SIP up to 10 Mbps point-to-point Up to 10 Mbps total MultiSite bandwidth Ability to connect up to four HD sources and 8 microphones directly to the codec Full duplex audio with high-quality stereo sound Full application programming interface (APIs) Ability to take advantage of Cisco TelePresence Total Solution Management, transcoded HD MultiSite, recording and streaming, Ad-hoc Conferencing, and firewall traversal Cisco TelePresence ClearPath packet loss protection technology for optimal experience Cisco Unified Communications Manager native support (requires Cisco Unified Communications Manager version 8.6 or higher)

Specification	Description	
Audio standards	G.711, G.722, G.722.1, G.729AB, 64 kbps and 128 kbps MPEG4 AAC-LD mono and stereo	
Audio features	CD-quality 20 kHz mono and stereo Eight separate acoustic echo cancellers Eight-port audio mixer Automatic Gain Control (AGC) Automatic noise reduction Active lip synchronization	
Audio inputs (fifteen inputs)	 Eight microphones, 48V phantom powered, Euroblock connector, each with separate echo cancellers and noise reduction; all microphones can be set for balanced line level (2 Microphones included in base package) Four balanced line level inputs, Euroblock connector (one balanced line level input used when VGA-DVI presentation cable is used) Three HDMI, digital: stereo PC/DVD input (one HDMI audio input used when HDMI-HDMI presentation cable is used) 	
Audio outputs (eight outputs)	 Six balanced line level outputs, Euroblock connector Two HDMI outputs (MX700: Both HDMI audio outputs are used for the 2 screens. MX800: One HDMI audio output is used for the screen) 	
Dual stream	 H.239 (H.323) dual stream BFCP (SIP) dual stream Support for resolutions up to 1080p30/WUXGA, and independent of main stream resolution 	
MultiPoint support	 Five way embedded SIP/H.323 MultiPoint (reference MultiSite) Cisco Ad-Hoc Conferencing (requires CUCM, Cisco TelePresence Server and Conductor) Cisco Conferencing Active Control 	
MultiSite features (embedded MultiPoint)	 Five way 720p30 High Definition, three or four way 1080p30. Full individual audio and video transcoding Individual layouts in MultiSite continuous presence H.323/SIP/VoIP in the same conference Support for Presentation (H.239/BFCP) from any participant at resolutions up to 1080p15 H.264, encryption, and dual stream from any site IP downspeeding Dial in and dial out Conference rates up to 10 Mbps 	
Protocols	 H.323 SIP Single call stack support, either H323 or SIP registration ISDN (requires Cisco TelePresence ISDN Link) 	
Embedded encryption	 H.323/SIP point-to-point and MultiSite Standards-based: H.235 v3 and Advanced Encryption Standard (AES) Automatic key generation and exchange Supported in dual stream 	
IP network features	 DNS lookup for service configuration Differentiated Services (QoS) IP adaptive bandwidth management (including flow control) Auto gatekeeper discovery Dynamic playout and lip-sync buffering H.245 DTMF tones in H.323 Date and Time support via NTP Packet Loss based downspeeding URI Dialing TCP/IP DHCP 802.1x Network authentication 802.1p (QoS and class of service [CoS]) ClearPath Medianet: Mediatrace and Metadata 	

Specification	Description
Cisco Unified Communications Manager (requires Cisco Unified Communications Manager Version 8.6 or later)	 Native registration with Cisco Unified Communications Manager Basic Cisco Unified Communication Manager provisioning Firmware upgrade from Cisco Unified Communications Manager Cisco Discovery Protocol and DHCP option 150 support Basic telephony features such as hold, resume, transfer, and corporate directory lookup
IPv6 network support	 Dual-stack IPv4 and IPv6 for DHCP, Secure Shell (SSH), HTTP, Secure HTTP (HTTPS), DNS, and Differentiated Services (DiffServ) Support for both static and autoconfiguration (stateless address auto configuration)
Security features	 Management through HTTPS and SSH IP administration password Menu administration password Disable IP services Network settings protection
Network interfaces	 One LAN/Ethernet (RJ-45) 10/100/1000 Mbit Two LAN/Ethernet (RJ-45) interfaces to be used for Cisco TelePresence Peripherals
Other interfaces	Two USB host for future usage GPIO
